

Economic Responsibility: Reducing CO₂ emissions and Prevention of Pollution

Our Key Sustainability Services

To realize our Environmental Vision, we changed our old printing machine to environmental friendly featured printer to reduce our carbon footprint and pollution.

1. Eco Printing

We help you to communicate with your audience through your print material. Your print material is the output of an energy saving machine, manage under the ISO 14001 certified environmental management system (EMS) and ISO 9001 quality management system. It uses environmental friendly consumables like vegetable based ink and/or Forest Stewardship Council (FSC)* certified recycled paper.

2. Paper based office stationery products

We design and develop office stationery products such as notebook, diary, paper folder, calendar, etc. All the designs will consider the life cycle of the product. All products that carry the brand name Meeco are made from FSC certified paper.

Benefits of using Eco Printing:

- Shows your efforts to preserve natural resources, reduce waste and prevent pollution
- Enhance your Corporate Social Responsibility (CSR) rating
- Build your green image in communication
- Make everyone feel better about you

* Forest Stewardship Council (FSC) logo is issued by FSC organization founded in 1993 as a result of the UN Earth Summit in Rio de Janeiro. It promotes ecological and socially responsible use of the forests. Besides the timber industry, FSC also covers the areas of paper and processing.
