Green Supplier Circle

Invitation to NetsEco's Green Supplier Circle

We will invite our main Suppliers to a coffee talk, on 6 November 2014 (Thursday).

The objective of this activity is:

- To create awareness about Green Purchasing
- To increase resource efficiency and reduce environmental impact
- To build a responsibly supply chain for the Eco industry

We hope that we can have a better cooperation with our suppliers in the future.

Christmas and New Year Party

The Eco Welfare Committee is organising one Christmas and New Year Party on 26 December 2014 at one of our Director's house.

The aim of this newsletter is to communicate the environmental friendly initiatives taking place at Nets Printwork to our stakeholders. We are committed to supporting and promoting sustainable products and services. At the same time, we would like to encourage all our stakeholders to become supporter or even advocates for sustainable development. This is only the first step in transforming our core business area, we are expecting more sustainable partners for future projects.

In His Own Words

Mr. Teh Leong Sim
Group Managing Director
Nets Group of Companies

Congratulation to our colleague Ms. Teh Soo Tyng as her paper "Beyond Green Office Guide" has been accepted by CARE Innovation International Conference. This is her first attempt to write. The paper introduce the definition of Eco Office as a workplace that influences individual behaviours, attitudes and habits through green purchasing, green operation, and green engagement to allow employees work productively towards green economy growth. The framework focus on four area i.e. Green Purchasing, Green Operation, Green Engagement and Green Growth is developed to provide the overall guideline to build an Eco Office.

We have started to roll out the Eco Office Initiative Project (EOIP) to test the implementation of the concept. The project aims to help 100 organisations to turn green through the implementation of Eco Office in two years time.

The project idea is well received and we have the honour to kick start the initial promotional campaign at two major exhibitions i.e. Eco Build 2014 at PWTC and IGEM 2014 at KLCC. The design of the booth which is using carton boxes as the backdrop managed to draw attention of the visitors.

We are still in the process of finalizing the technical committee to review the assessment criteria for the Eco Office. Once the assessment criteria is ready, it will be posted online at the project website i.e. www.ecooffice.my

We believe the EOIP can help different organisation to be more sustainable. The more Eco office, the more Eco concept can be spread out the community. Together, we can change the office.

Eco Office Initiative Project

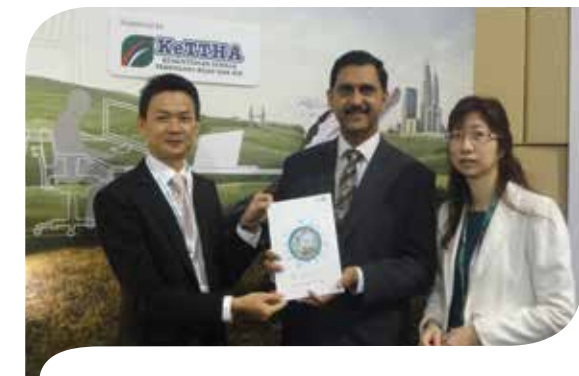

Corporate Social Responsibilities

On the other hand, our CSR booth not only attracted the attention from the customers who are interested on Eco and Go Green programme, but also drew the attentions from the government and NGOs. The Eco Office Initiative Project was launched by YB Datuk Harjeet Singh, Deputy Sec. Gen of Malaysia Ministry of Energy, Green Technology & Water on 18 October 2014.

The objectives of the project:

- To help company to turn green
- To conserve natural resources, reduce waste and energy through responsible management
- To establish a model for higher productivity in the workplace
- To create a more enriched working experience

Events

IGEM 2014

Our company's booth won the Eco Booth award in this IGEM Exhibition, which was held on 16-19 October 2014 at KLCC.

We had two booths in IGEM 2014 to promote our business and Eco Office Initiative Project. One of the booths was to promote our company commercial products and service while another was to promote the Eco Office Initiative Project (CSR Project). We had introduced our latest series products of Eco stationeries, Eco gift and Eco printing to the consumer. A lots of consumer walk into our booths to seek for Eco products and services.

Kenduri Hari Raya

Events

The Eco welfare committee had organised a celebration activity for Hari Raya on 13 August 2014 (Wednesday) for the first time. The aim is to strengthen the relationship between the employees.

We had a Malay traditional apparel competition. Employees were divided into groups and they had to dress up one employee with the given material within a given time frame. We hope this event could educate employee to have a better understanding about the local traditional culture.

At the kenduri Hari Raya

Most of the non-Muslim are lacking of knowledge on wearing the Malay traditional apparel so there are many innovative ways of wearing it. However, after the demonstration from a Malay Colleague, others also tried and able to wear it in the correct way. Everyone was having an enjoyable evening.

Tree Planting

The event was reported at The Star newspaper

Our company continued the tree planting efforts for the fifth time on September 6 of this year. This time we worked with Environmental Interpretive Center (EIC) of Malaysia Natural Society (MNS) to plant Rhu Pantai at Sepang Goldcoast, Bagan Lalang.

This is the annual on-going tree planting event with the themed "Growing the seeds of Hope" to create awareness toward public and to inspire them to recognise the vital of ecosystem and responsibilities of conservation the environment.

This eco event was attended by more than 40 participants including employees and their members. A total 30 units of 5 feet height coastal tree of *Casuarina spp.* or known as Rhu Pantai, was planted on Bagan Lalang. The participants have to work together from digging holes, planting tree, building supports and watering the coastal trees, this is an indeed challenging as the trees was taller and heavier than expected.

The event ended with the joy and sweat of participants. Each of the participants was given a participation certificate of tree plantings to appreciate their hard work.

Lim Kok Weng University Student Visit

15 students of Lim Kok Weng University visited our company on 8 September 2014 (Monday). We introduced the eco printing business nature and explain on the Eco concept that uphold by us.

The students were very active and they also asked a lot of questions on how printing could go green. The students were impressed after we have explained our Eco concept and show cased the products.

We hope to enhance the awareness of Eco concept in public especially, in the young people because they will be the leading force of the Eco development in the future.

Eco Build

We had introduced Eco office initiative project at EcoBuild Southeast Asia 2014 on 17-19 September, 2014 (Wednesday- Friday). It is a CSR program to share our Eco office concept to the public, create awareness on the society and companies.

The project emphasis on educating the companies and public on how to be a part of green / Eco office. Hence, in the soft launching, we are promoting the Eco Office and also recruiting more companies to join in the project. We hope to gather expertise from different field to share their knowledge on training green and create a platform for companies to go green.
