

RFID Warehouse Management

Eco Tree created by Eco Welfare Committee to reduce waste generation and promote the reuse and recycling of waste paper products by adding wishes to a tree provides an opportunity for employees to share their hopes, dreams and aspirations for the future.

In His Own Words

Message from the Managing Director

We are glad to have three more staff to receive the 10 years long service award. This year we have selected a crystal lighting type of design as the long service award. We are proud and look forward to maintain the low turnover rate of less than 1% per year.

We are going to see many changes for this year as we will bring in new machinery. We are replacing our old press machine with latest version press machine. The change is also align with our new direction toward eco packaging as the new machine are able to cater the need for packaging printing.

It is imperative that we demonstrate commitment towards sustainability and digital transformation. I am pleased that we continued to make significant progress with the customized ERP system and integrate it with the objective of IR4.0 Digital Transformation programme.

Mr. Teh Leong Sim
Group Managing Director
Nets Group of Companies

Publication Committee

Chairperson / Chief Editor : Ms. Teh Soo Tyng
Editorial Assistant : Ms. Tan Seok Kim
Creative : Mr. Muhaimin bin Abd Hamid

In Her Own Words

Speech by Sustainability Director

This year, we do not organise or accept plant tour / group visit to our site because of the concern and prevention measures of covid-19 as well as the upgrading activities in our production site. This is also an "assessment" year for us. We are expecting eight audits and assessments throughout the year.

Following the direction toward smart eco printing and eco packaging, we see the challenges in integrating the new system with our existing practices. While being excited by these new initiatives of IR4.0, we continue to aim to be pragmatic in our approach.

ESG is a fast evolving topic and is vital for our stakeholder to understand the challenges and opportunities. Hence we aim to transform our Sustainability Report 2021 to ESG report. We look forward to introduce our first ESG report by end of this year.

Ms Teh Soo Tyng
Director of Sustainability

Digital Warehouse Management Systems [DWMS] (8 January 2022)

We utilised Radio Frequency Identification (RFID) technology in conjunction with our IR4.0 digital transformation to identify paper raw materials for warehouse management. There is a device that reads information contained in a wireless device or "tag" from a distance without making any physical contact or requiring a line of sight. Furthermore, we introduce QR code in job sheet to provide easy access to online information through smartphone or tablet.
