In His Own Words

Message from the Managing Director

This year is a challenging year for the business of all our clients and thus we are also affected as part of the supply chain. However, we continue to strive to increase the confidence of our clients through our sustainability agenda.

We are pleased to announced that we are the first printing and packaging company to be B Corp certified in Malaysia. B Corp certificate is an international certificate that recognize company's ESG practices. B Corporations refers to companies that meet high standards of social and environmental performance, accountability, and transparency. B stands for Benefit for all. The B Global Network mobilizes the B Corp movement to change our economic system to positively impact all stakeholders — workers, communities, customers, and our planet.

Being part of the B Corp global community, does not mean that we are perfect, but it is another opportunity for business working collectively for economic systems change. We hope this change will attract more companies to join the force for good. At the same time, it will guide us to improve further for the coming years for the benefits of all our stakeholders.
